## SUMMARY

Experienced MERN developer proficient in Azure, Docker, and Jenkins. Skilled in building robust web apps with expertise in both front-end and back-end development. Leverage Azure for efficient deployment and scaling. Streamline development with Docker, ensuring consistency. Automate pipelines with Jenkins for faster delivery and improved productivity.

---

## EXPERIENCE

### Salesforce Email Developer

eClerx

July 2022 - March 2023, Mumbai, India

- I specialize in crafting dynamic email templates using Salesforce Marketing Cloud (SFMC) with AMPscript for seamless dynamic content infusion, complemented by expertise in HTML, CSS, and JavaScript for visually appealing emails.
- Additionally, I leverage Node.js and React to develop custom tools, enhancing efficiency and functionality. My skills enable me to create engaging, personalized email experiences, optimizing workflow and user experience.

### .NET Developer Internship

VDBS Consultancy

January 2022 - March 2022, Mumbai, India

- The process involves conceptualizing, designing, and crafting webpages using the ASP.NET Framework, powered by C# for robust backend functionality. HTML, CSS, Bootstrap, and JavaScript are utilized for visual aesthetics, creating dynamic webpages.
- Additionally, Web APIs developed in C# enable seamless communication between front-end and backend systems, resulting in modern, responsive websites with functionality and visual elegance.

---

## PROJECTS

### Netflix Movie Data Repository | Personal | June 2023 - July 2023

- Constructed reliable data repository to store Netflix movie data using NEXT JS and SCSS, which uses the TMDB's Movie collection API.

### BarberShop WebApp | University of Mumbai | December 2021 - March 2022

- Created a comprehensive BarberShop Management System using ASP.NET C#, MS SQL, HTML, CSS, and JavaScript, facilitating seamless appointment scheduling for customers, barbers, and stylists, with automated email notifications.
